TexVoIP Fleet Suite
Asset Tracker

No matter what business you're in, missing, lost or stolen assets can cost you time and money. TexVoIP Fleet Suite Asset Tracker enables you to track and manage your high-value assets; helping you save money and run your business more effectively. Whether your business uses trailers, containers, construction equipment, or other portable equipment, you'll always know the locations and statuses of your assets. With additional sensor readings you are instantly alerted in cases of unauthorized activity, such as open doors, fuel theft, and usage of power take-off equipment.

Tracking for any asset

- Transportation equipment: assets that move daily or sit for long periods, such as trailers and shipping containers
- Mobile office or storage: assets that stay on site for long periods, such as construction offices or storage containers
- Unpowered construction or field service equipment: assets that change locations intermittently, such as pumps, compressors, and generators
- Powered construction equipment: assets that move on site and between sites, such as bobcats, backhoes and cranes
- Refrigerated trailers: trailers and containers that require climate control monitoring

Tracking technology adapted to your needs

TexVoIP Fleet Suite Asset Tracker adapts its operation to your asset's current status; changing transmission modes based on whether your asset is stationary or on the move.

- Stationary without power**:** transmits location once a day
- Stationary with power**:** transmits location every 4 hours
- Moving with or without power**:** starts transmitting on motion after 5 minutes, and continues to transmit every hour until motion stops*
- Device is tampered with or a significant change in sensor** data values**:** immediately transmits an alert, along with location and status information

* Motion-enabled setting. Frequency of transmission is adjustable.
** Up to 2 sensor connections, digital or analog. Sensors can be purchased separately.

Rechargeable battery

The AT1000 Series feature a rechargeable battery. A built-in charger enables the device to recharge whenever it is connected to power, automatically informs you of charging activity and battery status via alerts. The device can recharge the battery in subzero temperatures.

Long battery life

Since the device only transmits when it needs to, activity-based transmission modes maximize battery life delivering more time in the field and less time in the shop.

AT1000Series key features

- Compact and simple to install
- 3G HSPA network
- 4 activity-based transmit modes: stationary, moving, connected to power and change in sensor status.
- Onboard 3D accelerometer
- Emergency push button
- 2 configurable I/O sensors (available on AT1000 and AT1000XT)
- Durable IP67 certified casing
- Over-the-air configuration and firmware upgrades
- 1 year warranty
