

TexVoIP Colocation

Consolidate and grow cost-effectively and reliably.

Expand capacity

Moving into new markets or acquiring new companies means increasing data center resources. In today's climate of tight budgets, finding the funds to build a new data center is no easy task. And, data center construction can take as long as 12-18 months.

TexVoIP Colocation is a subscription-based, turnkey solution that delivers high bandwidth, low-latency connections, along with redundant WAN connections within TexVoIP Internet Data Centers. Now, you can avoid facility construction and related expenses, while simplifying IT management and budgeting.

Unmatched availability

With TexVoIP, quickly expand both capacity and data reach with less disruption and more flexibility. TexVoIP Internet Data Centers consistently deliver the highest standards for enterprise performance, reliability, and security—backed by our 99.999 percent availability guarantee.

Maintain control

TexVoIP Colocation allows you to maintain control over your data within a fully redundant, enterprise-class data center, freeing up your IT staff to focus on other business initiatives.

Potential benefits

- Quickly deploy high-bandwidth, low-latency IT services globally
- Achieve 99.999 percent availability
- Reduce risk with layered security and compliance readiness
- Avoid capital investments through a predictable monthly fee
