

TexVoIP Fleet Suite Dispatcher

TexVoIP Fleet Suite is a unique fleet, asset, mobile workforce and dispatching solution, which provides you with the ability to track and manage your vehicles, mobile workers and help optimize your operations in a single cloud-based platform. Whether you provide same day on-demand services, distribution, scheduled route based services, dedicated fleet services or all of them, TexVoIP Fleet Suite is the one platform that can help you effectively manage it all.

Advantages

- **Robust Route Management:** save time creating complex multi- leg routes and auto-assign to drivers by building route templates and defining dispatch zoning conditions and driver certifications.
- **Sophisticated Billing & Pricing Modules:** automate complex billing, settlements and taxing processes with multiple conditions based on zoning, service categories and other elements.
- **Bring Your Own Device:** equip your drivers with our Dispatch mobile application on their phones and they are instantly ready to receive orders, update order status, and capture signatures and package barcodes.

Manage every type of service

- **Smart Routing:** Make near real-time adjustments to live routes as new orders are received.
- **Optimized Distribution:** Automatically optimize distribution routes and easily re-organize stops as your capacity changes.
- **Control the Schedule:** Easily control and optimize scheduled (appointed-based) routes.

Next-gen dispatch

- **Dispatch Zones:** Automatically assign work by geographical regions for packages, distribution routes, and drivers.
- **Route Templates:** Capture orders or stops that are repeated regularly and are based on a pre-determined schedule.
- **Distribution/Route Planning:** Graphical assignment of stops or order on route instance to separate drivers.

Billing & pricing

- **Client and Driver Rate Charts:** Create multiple charts to accommodate a variety of different pricing and pay structures using a variety of rules and conditions.
- **Automated Settlements:** Multi-filter capabilities enable you to generate settlements by logical groupings.
- **Fuel Cost Matrices:** Leverage the fuel cost matrix to address the impact of fluctuating fuel prices on driver pay and client fuel charges.

Resource management

- **Resource Certifications:** Capture customizable certifications and licenses to each driver record with notifications upon expiry.
- **Suggested Resource:** Streamline your dispatch process with ability to see drivers most suitable for the pending job.
- **Settlements:** Establish configurable settlement options including defining how often it is generated, the output format, revenue amounts, and/or deductions.
